- Check if title deed is submitted. Deed must correctly correspond with the property.
- Check for restrictions in deed.
- If not registered, a draft deed with an attorneys letter, confirming the transfer to be supplied.
- On Subdivided properties a Regulation 38, must be provided if the title deed is not registered.
- If property is owned by a company or an entity, then a company resolution and power of attorney is required.
- Zoning and SG Diagrams must be supplied. (SDP, Building Line Relaxation or consent may be required)
- Check if the siteplan corresponds with the SG Diagram. Check if zoning permits the use shown on the plans.
- SANS 10400 FORMS 1-2 must always be completed by the owner, architect and competent persons (engineers, specialists)
- SACAP Registration form must always be submitted.
- Always make sure that the owners’ details and signature are on the plans.
- All application forms to be dated and signed by the owner, competent person/s in black ink (A5-SANS10400)
- Always make sure that the architect/draughtsman/architectural technologists details are on the plans.
- Check that a registration number is supplied by the Architect, or registered person.
- Additional documentation may be necessary depending on the application eg. Fire rationals, building line relaxations sdps etc.
- Age of Building to be declared or necessary Heritage approval must be provided, if required (PHRAG)
- On an application where additions or alterations are proposed, the previously approved plans must be provided. (PP’S)
- 3 sets of plans to be supplied (1x colour, 2x black). OR 3 colour.
- Also, the preferred paper size is A1 (MULTIPLES OF THE A SERIES)
- Only large projects should be submitted in A0 size. This is not compulsory, but should be encouraged.
- The scale cannot exceed 1:100 for floorplans, and 1 : 200 for elevations. ;
- Siteplans can be in modules from 1:100, 1:200, 1:250, 1:500, 1:750 OR 1:1000. Very seldom 1 : 1500.
- Building lines to be shown as per zoning info., and if encroached the customer must be advised to relax prior to submission
- All boundaries must be clearly shown, and dimensioned. Cross check with SG Diagram.
- All existing structures to be shown with clearly dimensioned distances from all boundaries
- All new structures must be coloured in and distances from boundaries and building lines to be shown on.
- Any servitudes or existing municipal services on the site to be shown. Nothing to encroach into servitudes
- Municipal sewer connection point to be indicated, together with existing and new drainage connecting to such.
- North point to be provided and scale of drawing.
- All proposed demolition work to be shown in dotted lines.
- Street name and all street furniture to be shown outside the site.
- The natural ground contours at suitable vertical intervals or spot levels at each corner of the site.
- The existing or intended point of access from any public street
- All adjacent stands to be shown in dotted line, together with adjacent stand numbers
- A full area schedule must be supplied indicating the following : stand area, ex floor area, additional floor area, F.A.R, coverage
- All new work to be coloured in, and hatched on floorplans, including drainage.
- Floorplans must be drawn in 1:100 scale, unless the project is of a large proportion.
- All rooms/spaces to be designated and labelled.
- Full dimensions to all areas must be shown
- Existing structures must be differentiated from new, by not being coloured in.
- All demolished structures to be indicated in dotted lines.
- Section lines and direction of cutting planes to be shown correctly.
- Full details of drainage, including existing and new sewer lines.
- All sanitary-wares must be shown to scale, and connection points.
- Staircases to be indicated correctly with stair notes (no. of risers and treads)
- All doors and windows/glazing areas to be shown in proper scale.
- Full floorplan/layout must be submitted for additions. No partial/cut out floorplans must be accepted.
- Section lines to be clearly shown, with correct direction.
- All new work to be coloured in.
- All floors to ceiling heights must be dimensioned.
- All floors to underside of lintol height to be dimensioned (windows and doors)
- Correct scales to be shown (1:100, 1:50, 1:25, 1:20 etc.)
- All construction notes to be shown. (Roof notes, slab notes, and surface beds, and foundations)
- Full stair detail sections to be shown if required.
- Heights to boundary walls, or terrace walls must be indicated where necessary
- Natural ground levels to be shown (NGL)
- Finished floor levels to be indicated (FFL)
- All new drainage to be coloured in.
- Make sure that all necessary elevations are shown. (North, South, East, West)
- Correct scale of elevations must be indicated (1:50, 1:100, 1:200 only)
- All external finishes to be noted on elevations
- Natural ground levels, and Finished floor levels to be shown on each elevation.
- Drainage to be shown on elevation.
- All heights of boundary walls and terraces to be dimensioned.
- Distances from boundaries to be indicated on all elevations
- Full description of glazing, frame type and ironmongery to be indicated on schedules.
- Fully dimensions and tags to be indicated
- All energy efficient interventions to glass to be indicated (eg. Coated film, low e glass, double glazing, etc to be noted.)
- All openable and ventilated sections to be indicated in dotted line on windows, and doors.
- All documentation with regards to PART XA –Energy efficiency in buildings MUST be provided: hot water system, roof insulation, electrical lighting layout, and fenestration calculations OR Rational Design.
